

tweetMyMoney Commands

All secure requests to MyVantage® also include a **Correspondence Authentication Code** to help you identify e-mail and text messages originated or returned by Vantage. On tweetMyMoney returns, this code will appear at the end of each message. Visit www.vcu.com for more information about our Correspondence Authentication Code. Also, for newer Twitter users, the command “d myvcu” is another way to send a Direct Message directly from your tweet box or text message.

Balance: #bal

Returns all supported share suffix balances (suffixes 0, 6, 7, 8, 9).

Example
